JUDGING CRITERIA

The evaluation process for entries to the FIT Sport Design Awards is based on various judging criteria. These criteria are not comprehensive and not all criteria are applied to each project, they simply provide an orientation framework and basis for judging — which is complemented by each individual juror's expertise and socio-cultural background.

Each member of the Jury is passionately committed to providing a fair evaluation. Jury members are assigned categories based on their specific background and expertise. Our jury members cast their votes individually and anonymously to ensure unbiased and impartial judging. Jury votes are tallied and the highest overall scoring entries are selected as winners.

- Aesthetics — form, shape, color, texture, finishing, the material used, etc.
- Innovation — does the apparel/gear provide something new to the market or supplement/improve an existing product?
- Practicality/Functionality — ease of cleaning, safety, repairs, maintenance
- Durability — the quality and longevity of the product, is it adaptable to extreme conditions?
- Impact — the benefit delivered to the athlete, does it increase performance, or increase comfort?
- Ecological compatibility — potential environmental and/or ecological impact, local produce, repair circle, materials used.
- Emotional quotient — in addition to fulfilling its practical purpose, does the apparel/gear create a sense of enjoyment and satisfaction?
